

ENVISIONED AND RATIONALIZED MVP'S

MVP #1

- Develop a sign in and login page
- Validation of the signup and login pages to ensure access to those with proper credentials
- Render a calendar view
- Have basic functionality of the calendar to allow the manipulation of dates including: adding, removing, amending

MVP #2

- Have the ability to customize the organization of the events within the calendar (by class, project, etc.)
- Being able to prioritize a specific event type like exams, assignments over say assignments or group check-ins
- Allow a user to have multiple calendars within their account (personal ones as well what would later become shared calendars)

MVP #3

- Implement the calendar sharing functionality with multiple users
- In-app chat and messaging functions
